

NINETY-FIRST ANNUAL
STATISTICAL REPORT of
SEVENTH-DAY ADVENTISTS
1953

ISSUED BY THE
GENERAL CONFERENCE OF
SEVENTH-DAY ADVENTISTS
H. W. KLASER, STATISTICAL SECRETARY
TAKOMA PARK, WASHINGTON 12, D.C.

STATISTICAL REPORT

of Seventh-day Adventist Conferences, Missions, and Institutions in World Field

For the Year Ending December 31, 1953

We are happy to be able to show encouraging reports of activities from conferences of all divisions.

During 1953 there were more people baptized and identified with the Seventh-day Adventist faith than during any year in the history of the denomination. Total baptisms were 80,036. Making allowances for deaths and apostasies, there was a net increase in membership for the year of 63,360. We are confidently looking forward to reaching a total church membership of one million during 1954. But when that large figure is reached, there will still be approximately 2,400 persons in the world to each Seventh-day Adventist. Southern Africa has well passed the 100,000 membership, and both Inter-America and Southern Europe will pass this figure during the first quarter of 1954.

The church is not only growing in numbers, but we feel we have a converted church. The Holy Scripture tells us that "where our treasure is, there will our heart be also." During 1953 the members around the world paid into the treasuries of the denomination \$60,412,295.49. Of this amount, more than 36½ million was tithe, nearly 12 million for foreign missions, and nearly 12 million for home and local work. It is interesting to note that the North American Division, with 29.8% of the members, paid in 79.1% of the total funds. There are several factors that bring this about. Some are, first, many Seventh-day Adventists live in undeveloped countries with a different standard of living, and they have not had to contend with the artificial influences of gold standards or controlled currencies. Second, although all funds are converted to U.S. dollars, because a common currency is necessary for comparative purposes, yet if funds of each country could be shown in their own unit of currency, it would be more favorable to their report. Seventh-day Adventists are found in every strata of life from the highlands of New Guinea to the sidewalks of New York. We may not all have the same economic standards, but high spiritual standards of all have helped in making this fine report, and Seventh-day Adventists around the world are one in believing that figures and other tangible evidences are not the full indication of how near is the completion of the preaching of the gospel to every nation, kindred, tongue, and people, and the glorious appearing of our Saviour.

Note: While church contributions throughout the world during 1953 increased by \$4,314,226.41 over 1952, as expressed in U.S. currency, it is to be remembered that in most overseas divisions contributions in local currencies have increased to a considerably greater extent than this report would seem to indicate, as adjustments in international monetary exchange rates have affected adversely such exchange calculations.

FOOTNOTES—TABLE 2, SECTION 1, EDUCATIONAL INSTRUCTIONS

(a) The system of educational work outlined by the Department of Education of the General Conference in 1906, comprising sixteen grades or years of study, is arranged as follows: Elementary church schools (information concerning which will be found listed under columns 26 to 29 in Table 1), grades 1-8; intermediate schools, grades 7-10; academies or secondary schools, grades 9-12; colleges, grades 13-16. In schools outside of North America this classification of grades cannot be fully followed owing to differences in educational systems and because training standards are not uniform in all localities.

The College of Medical Evangelists gives a four-year course based on a minimum of three years of college work; and the Seventh-day Adventist Theological Seminary offers three years of graduate class study above the regular college degree courses.

Part 3 of Section 1—Intermediate Schools—includes some schools doing eleven grades of work and even a few carrying classes in the twelfth grade, but which are not organized as regular academies. Schools with less than ten pupils above the eighth grade are not generally listed, but the number of secondary students in intermediate schools not shown in the detailed report is given in the total designated, "Pupils above eighth grade in Elementary Schools." Only pupils above the eighth grade are considered secondary students.

(b) The "capacity" of schools is the number of students that may be accommodated in classes, and does not refer to dormitory or boarding space provided. Buildings and student capacity of academies connected with colleges are included in the college figures.

(c) The number of pupils in Grades 1-8 in elementary schools connected with colleges, academies and intermediate schools is included in Column 27 of Table 1, and is shown here only for information, and not to be counted again.

The number of teachers in elementary schools connected with colleges and secondary schools is included with other church school teachers in Table 1, column 12, and is not counted in the totals of teachers in Section 1, except where the teacher groups cannot be divided in schools outside of North America, and for these the estimated number of elementary teachers is subtracted from the total.

(d) The grades taught in each school indicate the kind of work undertaken, as outlined in note (a). In North America intermediate schools generally are noted as teaching grades 1-10 or 1-11.

(e) In the column indicating laboratory facilities the word "No" occurs where the schools have none; the word "Yes" is used in connection with schools having such facilities. These facilities cover one or more lines of work in various schools as follows: Astronomy, chemistry, histology, physiology, zoology.

Schools having facilities for manual training are indicated by "Yes" in corresponding column; those not having such facilities are listed with "No" opposite. These facilities include one or more of the following: Carpentry, cooking, farming, dairy-ing, nursing, printing, plumbing, horticulture, dress-making, tent-making, broom-making, brick-making, etc.

(f) Column 15 shows the total number of graduates in finishing courses in the academies and colleges. In schools other than some training schools for workers outside of North America no graduates are counted below the twelfth grade. Graduates are for the school year ending in May or June, 1953.

(g) Column 19 gives the number of students (not graduates alone) reported as entering some regular line of denominational work. Student colporteurs selling literature during the vacation period, and persons continuing training in nurses' or medical courses are not considered as definitely entering denominational service at that time.

(h) In 1953 the College of Medical Evangelists graduated 193 students from the medical course, 49 from the nurse's training, 16 Medical Technicians, 6 X-Ray Technicians, 11 Physical Therapists, and 6 Dietitians. The Seventh-day Adventist Theological Seminary conferred 27 Masters, and 4 Bachelor of Divinity degrees.

(i) A number of students taking classes with the Home Study Institute are also enrolled in regular colleges and academies, and the most of the students studying with the Home Study Institute are carrying only one or two classes each. The Home Study Institute reports 41 instructors doing some teaching for them in 1953 who are connected with other educational institutions, besides the listed faculty members and office staff.

(j) For the past four years the number of nurses in training in sanitarium Schools of Nursing have been included, also the number of nurses graduating.

COUNTRIES, ISLANDS, AND ISLAND GROUPS IN WHICH SEVENTH-DAY ADVENTIST WORK HAS BEEN ESTABLISHED

The work of Seventh-day Adventists is being carried on in nearly all of the principal countries of the world, and in many of the smaller geographical and political divisions. It is generally considered that a country or political division has been entered by Seventh-day Adventist interests when regular medical, educational, or other mission activities are being conducted among the people of that particular area, or when there is in the territory one or more groups of persons connected in an organized way with the denomination, such as in Sabbath school or in church fellowship. A new field is not considered as entered when only itinerant preaching or colporteur work has been done, or when there are only a few scattered believers.

Recognizing the need of a reliable list of geographical and political divisions which could be used as a basis for checking the different areas in which Seventh-day Adventist work is being carried forward, the following action was taken at the 1946 General Conference session:

"Voted, That the designations of the several sections of the world field in which Seventh-day Adventists are conducting their work be based on the list of countries, islands, and island groups in such authoritative works as the *World Almanac* and the *Statesman's Yearbook*."

Following this procedure, the list shown below comprises the geographical and political divisions given in the *World Almanac* and the *Statesman's Yearbook*.

With world conditions as unsettled as they are at this time, it is not unlikely that political changes may render difficult the maintaining of stable lists of countries for checking purposes. Furthermore, there may be other standard catalogs of countries which should be consulted in addition to those mentioned above. The editor of the STATISTICAL REPORT will welcome any corrections or additions to the lists here presented, substantiated by authoritative sources of information.

Paralleling the standard list of geographical and political areas shown below, there are given the names of the countries, island groups, and islands in which Seventh-day Adventist work is being conducted at the present time, as far as they have been recorded in the General Conference office. This list also is subject to correction by those who are intimately acquainted with conditions in the various sections of the world field; and the list will be extended as new mission territories are entered.

Geographical and political divisions of the world as given in the *WORLD ALMANAC* and the *STATESMAN'S YEARBOOK*.

Summary

Number of Countries in the world, as listed above	280	2,400,000,000—100.0%
Estimated population of the world		
Number of countries entered and in which work is carried on by Seventh-day Adventists	197	
Population of countries in which work is carried on by Seventh-day Adventists		2,364,431,157— 98.5%
Number of countries in the world that have not been entered by Seventh-day Adventists	33	
Population of countries that have not been entered as yet by Seventh-day Adventists		35,568,843— 1.5%
N.B. Recent political developments in different parts of the world, resulting in the absorption of and combining together of certain areas hitherto considered to be separate political entities, have necessitated a considerable curtailment in the number of countries listed. The totals as given above are therefore somewhat reduced as compared with previous years. In no case, however, does this indicate the withdrawal of our denominational activities from any previously listed country or island.
