# FOUR CHALLENGING VOLUMES SELECTED for

"An aid to the minister in helping people to grapple successfully with problems of mind and spirit."

"The foundation volume in a set of four on the history of prophetic interpretation."

## SPIRITUAL COUNSELING

By John Sutherland Bonnell

True pastoral counseling carries no taint of the Catholic confessional, nor any resemblance to the psychoanalyst's techniques. Rather is it ministerial service for individual souls raised to a high level of personalized ministry, and aided by well-defined principles that govern the mind. Adventists, above all others, may rightly have a keen interest in this field of the mind in relation to religion. Our view of man calls for an integration of mind and spirit and body to constitute one living entity. That interaction involves both physical and mental health, as well as the health of the spirit. That is why we should take an active interest in the area of ministerial activity known as pastoral counseling. This phrase is used to describe a rather well-defined endeavor based upon sound principles of the mind, that is, sound psychology, in helping people to grapple rightly with various problems of mind and spirit. We as Adventist ministers will find something of vital interest and practical value for us in the book *Spiritual Counseling*. The author is pastor of a large Presbyterian church in New York City. This edition of his new book is printed especially for Seventh-day Adventist ministers and other workers for the denomination.

## PROPHETIC FAITH OF OUR FATHERS

By LeRoy Edwin Froom

The foundation volume in the set of four on the history of prophetic interpretation. The doors are thrown open upon a whole new world of evidence and understanding; the full intent of the prophetic scheme unfolded; the amazing significance of the symbolism employed; the tie-in established with early Jewish and Christian interpretation; the amazing witness of the pre-Constantinian church exposition; the revolutionary reversal of interpretation as an accomplished fact; the master stroke made against the millennium; the unrecognized emergence of the Little Horn; the identity of Antichrist; the initial application of the year-day principle to the 1260-, 1290-, 1335-, and 2300-day periods; epochal advances in application by Joachim, Eberhart, Olivi, and Arnold de Villanova and Cusa. All this is climaxed with four moving chapters on the Waldenses, and their defiance of Rome based on the prophecies. These and a hundred other features are all in Volume I, of this significant set.

STRENGTHEN YOUR MINISTRY

# r the 1949 MINISTERIAL READING COURSE

"A long-awaited personal workers' handbook for the ministry at large."

"A readable and accurate review of the scientific statements found in the Spirit of prophecy."

## THE BIBLE INSTRUCTOR

By Louise Caroline Kleuser

ng ..... \$2.50

\$15.25  
**\$12.95**

We have long awaited the appearance of a handbook for personal work. Not only the qualifications of the Bible instructor, man or woman, but also the distinctive opportunities of this profession need to be known. The author, a trained Bible instructor herself, here culls from her own experiences, as well as those of many

others, the best that inspiration, method, and example might produce. The book is replete with practical technique and successful ideas. Although the larger Bible work is featured in city evangelism, the author has well considered the needs of smaller areas. Bible work is not portrayed simply as a woman's work—it is a partnership of gospel service with the evangelist and pastor. The book is introduced by a section on general methods. Important chapters on the worker's personal problems are followed with illuminating ideas and suggestions. The last section of the book provides more than one hundred patterns of well-organized, up-to-date Bible readings.

## THE WITNESS OF SCIENCE

By George Knapp Abbott

Medical science is continually advancing and scientists themselves do not always agree as to the exact cause and nature of diseases. But where a complete and total picture of what is found in the Spirit of prophecy is compared with what is available in science, we find the statements made by Mrs. White borne out again and again. The author, Dr. G. K. Abbott, former medical superintendent of St. Helena Sanitarium in California, and of the Washington Sanitarium and Hospital in Maryland, and veteran promoter of health principles, has here produced a very readable, accurate, comprehensive review of the scientific statements of the Spirit of prophecy. He has brought to us the related reports from current medical and research publications, with full documentation. This permits the investigator to pursue further any feature which may appeal to him as of special interest. This scientific work is an excellent contribution to our denominational literature. It is recommended to both our ministerial and our medical brethren as an aid to a better understanding and appreciation of this highly important phase of the writings of the Spirit of prophecy. We believe it will be equally appreciated by members of the laity.
