General Information.

THE excellent co-operation of the union and local conference secretaries as well as that of the churches themselves has wrought such a progress in our reporting system that explanatory remarks are almost superfluous. There are, however, a few points worthy of notice here, especially as the report contains an extra feature or two which will not be easily understood without explanation.

According to the figures given here, it will be seen that the membership of the Division is apparently 59,217 as compared with 58,635 at the end of 1921. This gives a comparatively small net increase of 582. This is correct only in as much as it is based on the figures we have at hand, but in reality it does not show our proper standing. We have received no reports from the British Missions, the German Missions, and the Russian field with its over 8,000 members. In the case of the German Missions we have simply transferred the net gain to the proper column, while the figures for the British Missions remain the same. For Russia we have included the previous membership of 8,185 in columns 9 and 22, and also the figures of the last report in columns 7, 8, 34, 35, and 36 respectively. We hope to be able to give some tangible figures for Russia for the first

half of 1922 in the second quarter's report.

It should be noticed that the Special Offering for Russia from the three German unions and Scandinavia are included in the total offerings under column 31. As a result, columns 25 to 30 will not add up properly for these different unions and their local fields unless the special offering from each respective field is included. The sum of columns 25 to 30 in the grand total of the recapitulation plus the grand total of the Russian offering should approximate the total of column 31. While this offering for Russia should be specified and included in the column for total offerings, it is not possible to break into

the regular form, so we have specified it separately and yet included it in the totals of column 31.

Aside from this the figures should be self-explanatory. The value of some of the currencies, especially the German mark, have greatly decreased since last quarter, and consequently, while there is an increase in most cases when measured in home currencies, the dollar totals show a decrease. It will be seen, however, that some of the fields show an actual decrease.

We are glad that this report can come out on time in spite of the General Conference Session which might be expected to interfere somewhat with the general routine of our work. THE SECRETARY.
