Statistical Notes

For the past four years we have hoped to be able to report a net gain of two thousand but until now we have had to content ourselves with having surpassed each previous year's record. December 31, 1932, has brought that realization, with a net gain of 2,022. We regret having to report more than fifty per cent apostasies but we may expect that the seed will fall on shallow ground as well as on good soil.

We could have given you many more figures and it may be you will miss some of them. On the other hand you may conclude that there are quite sufficient here! At any rate, for the first time since the Northern European Division has been organized we are not reporting the local conferences in dollars. This is on account of the low value of the English pound, through which all currencies in the Northern European Division pass before being transferred into dollars. Each field is reported in its own currency, but dollars are given for the Union

totals. There is an exception, however, and that is for columns 42 and 43 in the general report. These are transferred at the normal rate. You will also notice that no comparisons have been made with former years. This is also on account of the rate of exchange. There is an exception here in the case of the institutions. These have been transferred at the normal rate, so the comparisons are level.

We regret that there is no space in this issue for the publishing house and church school reports. We hope to have these in the June number.

Much more can be written with reference to our annual report but there isn't any space, is there?
