The Statistical Report for 1927

A REPORT SHOWING SIXTY-FIVE YEARS OF PROGRESS

The following pages present the sixty-fifth annual Statistical Report of the Seventh-day Adventist denomination, for the year 1927.

Extent of Work

This work is now conducted in 127 countries, by eight Division conferences, 64 Union organizations, comprising 146 local conferences, and 211 mission fields, operating among a population aggregating 1,800,000,000, and employing 18,307 evangelistic and institutional laborers, who are using in their work 279 languages (publications being issued in 132), and connected with the movement are 291 institutions, representing, together with conference organizations, and 2,484 church buildings, a total investment (for 1926) of \$48,025,317.33, a per capita of \$183.42, and an aggregate annual income for both evangelistic and institutional work (for 1926) of \$41,337,362.44; a per capita income of \$157.88.

Membership

The membership of the 5,987 organized churches December 31, 1927, was 274,064, a net increase during 1927 of 12,230, or 4.67 per cent; the net increase for 1926 was 10,846; for 1925, 12,331; for 1924, 16,783; thus making a total increase for the past four years of 52,190, or 23.52 per cent increase in membership since 1923.

In 1915 the total membership of the denomination stood at 136,879, the gain since that time has been 137,185, the per cent of increase being 100.22. In other words, the membership of the denomination has more than doubled during the past twelve years. That is, for every 100 members in 1915, there are now 200.22 members.

Stated in another way, the gain during the last twelve years was more than during the preceding 53 years, and the efficiency of these members in making contributions for the extension of this work has likewise been increased. In 1915, they gave a per capita of \$24.89 for strictly evangelistic work; in 1927, a per capita of \$43.58, a gain of \$18.69 per member; that is, notwithstanding the doubling of the membership during the past twelve-year term, the efficiency of each member has been increased from \$24.89 to \$43.58. In other words, for every \$100 given by each member in 1915, each member now gives \$175.09.

Counting by decades from the organization of this movement, the per capita of total funds has run as follows: 1863, \$2.29; 1873, \$5.24; 1883, \$6.31; 1893, \$12.65; 1903, \$10.86; 1913, \$23.42; 1923, \$41.45; 1927, \$43.58.

From the accompanying table which makes a comparison of funds received during the past twelve years, it will be seen that the total amount received during the first 53 years after this work was organized aggregated \$35,083,192.93, while the total receipts during the past twelve years were \$107,256,890.90. In other words, for every \$100 received during the 53 years, there was received \$305.72 during the twelve years; or for every \$100 received on an average during each of the 53 years, there was received for each of the twelve years, \$1,350.27.

Now compare these figures with the increase in membership during the same period. The membership as it stood at the close of the first 53 years, ending in 1915, was 136,879; during the past twelve years, the increase has been 137,185; or for every 100 members gained on an average during each of the 53 years, the increase during each of the twelve years was 443 members. This shows clearly that for the periods under consideration, the funds received for the prosecution of this work have increased faster than the

members. This fact is also shown by a comparison of the per capita amounts of total contributions, which for 1900 was \$8.74; for 1915, \$24.89; and for 1927, \$43.58.

FOOTNOTES — TABLE 2, SECTION 4

The system of educational work outlined by the Educational Department of the General Conference in 1906, comprising sixteen grades, or of study, is arranged as follows: Church-school (information concerning which will be published under columns 22 to 26 in Table I), grades 1-8; intermediate schools, grades 7-10; colleges, grades 9-12; colleges, grades 13-16.

In compiling the returns, fractions of acres not included.

The "capacity" of schools is the number of that may be accommodated in classes, and not refer to dormitory or boarding accommodations provided.

The grades taught by each should indicate

the kind of work undertaken, as outlined in note (a).

(f) In the column indicating laboratory facilities the word "No" occurs where the schools have none; the word "Yes" is used in connection with schools having such facilities. These facilities cover lines of work in various schools as follows: Astronomy, chemistry, physics, histology, zoology.

Schools having facilities for manual training are indicated by "Yes" in corresponding column; those not having such facilities are listed with "No" opposite. These facilities range as follows: Carpentry, cooking, farming, dairying, nursing, printing, plumbing, horticulture, dressmaking, tent-making, broom-making, brick-making, etc.

(g) Column 14 shows the total number of graduates from all grades; cols. 15, 16, and 17, the

number graduated from grades 12, 14, and 16, respectively.

(h) Column 18 shows the number of students (not graduates alone) entering some department of denominational work during the year.

* No report received for 1927.

From the lists of schools contained in the preceding groups, North America and outside, there have been eliminated the names of some schools that are doing some advanced work, but principally primary work, and hence would be considered as coming under the general table where primary schools are listed. It has therefore been thought best to discontinue such schools from these lists. This will account for the apparent decrease in the number of advanced schools, as well as other items usually reported in this section of Table 2.

For a number of years the figures in Summary 7 have included information regarding certain sanita- riums and treatment rooms, and of those connected therewith which were listed in Table 2 as being under private management, but are now omitted from this report. This omission will account for the apparent decrease in the above figures.
