NOTE: All financial figures are shown in U.S. currency at fixed rates of exchange as voted by the General Conference committee. Most every division has shown a healthy increase in tithes and offerings when shown in their local currency; however, in some instances currency values have depreciated and exchange rates lowered within the year, thus creating an adverse showing when compared with preivous years.

In harmony with the provision of the General Conference Constitution, the calculations of per capita tithes and offerings are based on "the average of the membership of the four consecutive quarters ending on September 30 of the preceding year."

'Southern European membership reduced by 12,000 due to adjustment of figures previously estimated in certain countries.

FOOTNOTES ON EDUCATIONAL INSTITUTIONS

The system of educational work outlined by the Department of Education of the General Conference in 1996, comprising sixteen grades or years of study, is arranged as follows: Elementary church schools (information concerning them will be found listed under columns 26 to 29 in Table 1), grades 1-8; intermediate schools, grades 7-10; academies or secondary schools, grades 9-12; colleges, grades 13-16. In schools outside of North America this classification of grades cannot be followed fully awing to differences in educational systems and beeause training standards are not uniform in all localities.

The College of Medical Evangelists gives a four-year course based on a minimum of three years of college work; and the Seventh-day Adventist Theological Seminary offers three years of graduate claes study above the regular college degree courses.

Part 3 of Section 1—Intermediate Schools—includes some schools doing eleven grades of work and even a few carrying elasses in the twelfth grade, but which are not organized as regular academiee. Schools with less than ten pupils above the eighth grade are not generally listed, but the number of seeondary students in intermediate schools not shown in the detailed report is given in the total designated, "Pupils above eighth grade in Elementary Schools." Only pupils above the eighth grade are considered seeondary students.

The "capeity" of schools is the number of etudents that may be aecommodated in elasses, and does not refer to dormitory or boarding space provided. Buildings and student eapacity of academies connected with colleges are ineluded in the college figures.

The number of pupils in grades 1-8 in elementary schools conncted with colleges, academies and intermediate sehools is ineluded in Column 27 of Table 1, and is shown here only for information, and not to be counted again.

The number of teachers in elementary schools conncted with colleges and secandary sehoals is ineluded with other church school teachers in Table 1, column 12, and is not counted in the totals of teachers in Section 1, except where the teacher groups cannot be divided in schools outside of North America, and for these the estimated number of elementary teachers is subtracted from the total.

The grades taught in each school indicate the kind of work undertaken, as outlined in the first paragraph. In North Americea intermediate schools generally are noted as teaching grades 1-10 or 1-11.

Column 9 shows the total number of graduatee in finishing courses in the academies and colleges. In schools other than some training schools for workers outside of North America no graduates are counted below the twelfth grade. Graduates are for the school year ending in May or June, 1956.

Column 13 gives the number of students (not graduates alone) reported as entering some regular line of denominational work. Student colporteurs selling literature during the vacation period, and persons continuing training in nurses' or medical courses are not considered as definitely entering denominational service at that time.

COUNTRIES, ISLANDS, AND ISLAND GROUPS IN WHICH SEVENTH-DAY ADVENTIST WORK HAS BEEN ESTABLISHED

The work of Seventh-day Adventists is being carried on in nearly all of the principal countries of the world, and in many of the smaller geographical and political divisions. It is generally considered that a country or political division has been entered by Seventh-day Adventist interests when regular medical, educational, or other mission activities are being conducted among the people of that particular area, or when there is in the territory one or more groups of persons connected in an organized way with the denomination, such as in Sabbath school or in church fellowship. A new field is not considered as entered when only itinerant preaching or colporteur work has been done, or when there are only a few scattered believers.

Recognizing the need of a reliable list of geographical and political divisions of the world which can be used as a basis for checking the different areas in which Seventh-day Adventist work is being carried forward, by General Conference Committee action we are using the list of countries as published by the United Nations. The following report is based on information given in *Statistical Papers*, Series A, Vol. VIII, No. 3, July, 1956.

As changes are made from time to time in the administrative bodies or political boundaries of countries, and as such changes are recognized and published by the United Nations, we shall endeavor to change our list accordingly.

Certain countries are preceded by an asterisk (*) which denotes a country not as yet entered by work of Seventh-day Adventists. This part of the list is also subject to change, and anyone intimately acquainted with conditions, knowing of a correction that should be made, will kindly advise the Statistical Secretary, especially as new mission territories are entered.
