# WAGE <br> SCALE 

OVERSEAS DIVISIONS
of the
GENERAL CONFERENCE OF SEVENTH-DAY ADVENTISTS

Effective January 1, 1967

This Wage Scale which has been adopted by the General Conference Committee, should be strictly adhered to exeept where local conditions make necessary some adaptation or modification, in which case General Conference approval should be secured.

## INTRODUCTION

In order that there may be an equitable basis for the remuneration of various classes of workers, a denominational wage scale has been adopted, which applies in principle in all the world. The philosophy of the wage scale is expressed in the following paragraphs:

A spirit of sacrifice and dedication should mark God's workers irrespective of the position or deparmment they represent. The work of the church is a mission to which lives are dedicated, rather than a business or professional ventore, Reasonable comfort, modesty, and good taste will distinguish Cbristian workers. It is, however, recognized that varying conditions affect different aspects of the work in different ways. Some facets of the work are more directly alfected by economic factors outside of the church than are others, and by the differing economies of different areas of the country.

The church cannot fully compensate a dedicated ministry on a basis of reflecting adequately in money its talents, accomplishments, and contributions, but it does provide such ministry with a modest living wage in token recognition of resposibilities botne, preparation, professional certification or licensure, previous experience, and years of service.

It is further recognized that this very philosophy of remuneration calls for an adequate consideration of the element of individual need, unrelated to preparation, professional accomplishments, experience, responsibilities borne, or years of service,

Established wage scales should be strictly adhered 10 , and no special appropriations or special allowances should be made, except in cases of emergency as provided in the division working policy.

The following principles are incorporated in the wage scale for overseas divisions and are to be implemented in its operation:
a. The wage scale for overseas divisions incorporates basic salary rates expressed in percentages for various categories of service with recognition of the responsibility inherent in each position or category. The amount of the $100 \%$ level of the wage scale is determined by the division committee in the local cumency of the country in which a worker is laboring, and is reviewed annually by the division committee. The $100 \%$ level is the maximum rate paid an ordained minister.

1. A spread between minimum and maximum rates in the various eategories of from fifty per cent in the lowest rates to twenty per eent in the highest rates has been incorporated in the wage seale. In setting rates of salary within this spread, employing organizations
should take into consideration the following factors with respect to each worker:
(1) Preparation, education and dedication
(2) Previous experience, and achievement
(5) Years of service

## Allowances

Workers away from home on authorized travel may report the following:

Cost of hotel and/or motel accommodation.
Such daily travel allowance as may be arranged by the division.
Policy provides also under certain circumstances for other allowances such as rent subsidies, medicai and dental and optical expense allowances, automobile expense, etc.
